Fig fruit extract, standardised
to **abscisic acid (ABA)**

Cynamed™

Artichoke extract, standardised
to **caffeoylquinic acids** (≥ 4%)
and **inulin** (≥ 18%)

Founded in 1971, Euromed is a vertically integrated global leading manufacturer of premium standardised botanical extracts and natural active ingredients for the pharmaceutical, nutraceutical, food and cosmetic industries.

Euromed's innovation scientists have identified and concentrated key phytochemicals from the Mediterranean Diet in a new line of evidence-based fruit and vegetable extracts.

The proprietary **Pure-Blue Process™** water-only extraction technology preserves naturally occurring compounds while avoiding undesirable residues of organic solvents.

Locally sourced Spanish pomegranates, olives, artichokes, and figs are farmed sustainably, reducing transportation energy expenditure and the company's carbon footprint.
